Experience

Augusta University Medical Center Emergency Department
Patient Care Technician

- Ensure patient safety and comfort within the emergency department waiting room.
- Assist in the collection and point of care testing of patient samples
- Assist in the transportation of patients throughout the emergency as well as various other departments within the medical facility

United States Army
Cyber Operations Specialist

- Set up and maintained systems that closely monitored the receiving of security clearances by soldiers determining their entrance or departure from schooling.
- Compiled academic information on soldiers in training for both Fort Gordon and Corry Station. This allowed for soldiers to be approached accordingly when necessary.
- Controlled access and movement of the company's sensitive information.
- Conducted, set up, and ensured professional results of company graduation ceremonies.
- Provided and maintained security of female soldiers within the unit.
- Managed inprocessing and out-processing of soldiers.
- Participated in the cyber operations specialist pilot class.

Education

TheClubhou.se Code Bootcamp, Certificate of Completion
Training for Life Center, Certified Nursing Assistant

Awards

Certificate of Achievement: For assisting event coordinators of the Fort Gordon Special Olympics

Projects

Talker - a biomedical device that aids a person living with ALS in communication with others.
My Contributions:

- Researching different ways to attach the device
- Researching tracking methods for the device
- Researching the best software to use
- Learning how to use different softwares that were best compatible with the device
